

100% CASEIN FUSION 2.2

BUILD MUSCLE AROUND THE CLOCK

- 25 Grams Of Protein Per Serving
- Digests Slowly : Time Released Protein
- 5.5 Grams Of BCAA Per Serving
- 5 Grams Of Glutamine Per Serving

Two Delicious Flavors

Milk Chocolate Delight *Pudding Vanilla*

Protein Timing Doesn't Always Mean Right Now

Timing your protein intake is crucial for muscle growth. Quick-digesting protein sources are great for post-workout nutrition, but they're out of the digestive system and into your bloodstream very rapidly. That's great when you need a quick protein boost, but it's not ideal when you want to build muscle all day long.

When it comes to feeding muscle tissue 24/7, you need quality protein with a time-release effect...

The Right Proteins For Constant Muscle Feeding

Micellar casein and milk protein concentrate are digested slowly, allowing them to trickle feed your muscles for extended periods. Micellar casein can release muscle-building amino acids into your blood stream for up to seven hours after consumption, and that's why it's the main protein source in CASEIN FUSION.

The custom protein matrix in 100% CASEIN FUSION gives you 25 grams of slow-digesting protein per serving, and it includes 5.5 grams of BCAAs and 5 grams of Glutamine, the most abundant amino acid in muscle tissue.

100% CASEIN FUSION is the perfect choice for all-day amino acid release when used between meals, but a serving before bed can protect your hard-earned muscle while you sleep—a key muscle-preserving opportunity that many people never think of.

100% CASEIN FUSION can help preserve muscle and build new muscle all day and all night

Supplement Facts

Serving Size: 1 scoop (36.7 g)
