

LIPOREDUX

BURN MORE FAT FROM THE OUTSIDE!

- TOPICAL FAT BURNER
- USE DIRECTLY ON PROBLEM AREAS
- SUPPORTS OVERALL FAT LOSS*
- EASY APPLICATION WITH A PLEASANT FRAGRANCE & NO MESS

WHEN THAT FINAL LAYER JUST WON'T COME OFF

Fat loss takes time, and it can be a frustrating process if you don't see the fat disappearing from your trouble spots. That's because exercise and proper nutrition burn fat from everywhere, which means that the places you hold the most unwanted fat are usually the last to shrink down. It would be a dream come true if you could apply a fat burner directly to your problem areas...

PRECISION TOPICAL COMPOUNDS ENABLE MORE FAT BURNING

It used to be that you would reach a level of leanness and then have to accept that you were at your best, despite a final thin layer of subcutaneous fat in certain areas. LIPOREDUX solves that problem by allowing you to topically burn fat from everywhere with a no-mess formula that smells great.*

By applying LIPOREDUX directly to problem areas, the 6-phase precision formula begins to target those exact locations for fat loss. Because it's a topical solution, there are no stimulant effects or anything negative. The remarkable combination of ingredients in LIPOREDUX help to amplify insulin sensitivity, norepinephrine release and cAMP for increased fat oxidation.*

The beta-3 agonist in LIPOREDUX also helps release fat directly from brown adipose tissue, allowing it to be burned as energy and thus support the reduction of the fat cell nucleus size. This cellular downsizing results in a trimmer physique. In order to truly rid problem areas of unwanted excess weight, a potent diuretic is also included, which assures that the final details are etched in to perfection.*

If you have stubborn body fat that you can't seem to lose through exercise and nutrition alone, LIPOREDUX is your answer for eradicating that last layer from everywhere.*
