

MICRONIZED TO 200 MESH

CREATINE / CELL VOLUMIZER

PERFORMANCE CREATINE

INCREASE STRENGTH & MUSCLE VOLUME

- 5 GRAMS OF CREATINE MONOHYDRATE PER SERVING
- MICRONIZED FOR QUICK & COMPLETE ABSORPTION*
- FAST MIXING & NO WASTED RESIDUE
- INCREASES MUSCLE STRENGTH & SIZE*

MUSCLE ISN'T BUILT WITH PROTEIN ALONE

Combining proper nutrition and hard training are the keys to developing a healthy and athletic body, and supplementing with high-quality protein is one effective way to help build upon that foundation. When it comes to breaking beyond the realm of average, however, there is one major research-backed supplement that has helped increase strength and muscle volume more than any in recent years...

ADVANCED MICRONIZING TECHNOLOGY MAKES CREATINE MORE EFFECTIVE

Creatine monohydrate is one of the most researched and validated strength- and muscle-building nutritional supplements on the market, and it's with good reason. It's been proven to help restore adenosine triphosphate, or ATP, which is the predominant source of cellular energy, and it also helps add volume to muscle cell structures. That translates to increased strength during intense workouts, and more muscle gains.*

In order to completely maximize its benefits, however, creatine monohydrate should be fully dissolved in solution before ingestion. That's why PERFORMANCE CREATINE harnesses the power of CreaSolv brand micronizing technology. With 20 times more surface area than non-micronized creatine, PERFORMANCE CREATINE mixes quickly and completely. You can make use of every gram of creatine without any of the discomfort reported from less advanced varieties.*

PERFORMANCE CREATINE increases muscle power and size beyond the limits of non-micronized creatine monohydrate.*

AVAILABLE IN 300 G, 600 G & 1,200 G SIZES

FEATURING: **CreaSolv**

20x MORE SURFACE AREA
THAN NON-MICRONIZED CREATINE
