## HIGH ABSORPTION VITAMIN D3

VITAMIN D3 softgels supply recommended levels of this key vitamin in a highly-absorbable liquid softgel form. Vitamin D is normally obtained from the diet or produced by the skin from the ultraviolet energy of the sun. However, it is not abundant in food. As more people avoid sun exposure, vitamin D supplementation becomes even more necessary to ensure that your body receives an adequate supply.\*

Vitamin D is a secosteroid that enhances the absorption of calcium and phosphate through the intestine. Vitamin D3 or Cholecalciferol is one of the most important compounds in vitamin D. Relying on exposure to the sun to synthesize vitamin D is risky and therefore it is highly recommended to supplement the Sunshine Vitamin.\*

SAN's VITAMIN D3 delivers a high potency of 1,000 IU per serving that will keep your bones strong, prevent low calcium, that will support your bones, dental teeth and combat vitamin D3 deficiency.\*

**AVAILABLE IN BOTH 180 CT. & 360 CT.**
